**Once Upon a Time Lord**-Ivan Phillips 2020-02-20

'Every story ever told really happened...' (The Doctor, 'Hell Bent', 2015) Stories are, fundamentally what Doctor Who is all about. In Once Upon a Time Lord, Ivan Phillips explores a wide range of perspectives on these stories and presents a lively and richly-varied analysis of the accumulated tales that constitute this popular modern mythology. Concerned equally with 'classic' and 'new' Who, Phillips looks at how aspects of the Time Lord's story have been developed on television and beyond, tracing lines of connection and divergence across various media. He discusses Doctor Who as a mythology that has drawn on its own past in often complex ways, at the same time reworking elements from many other sources, whether literary, cinematic, televisual or historical. Once Upon A Time Lord offers an original take on this singular hero's journey, reading the unsettled enigma of the Doctor in relation to the characters, narratives and locations that he has encountered across more than half a century.

**When Opera Meets Film**-Marcia J. Citron 2010-05-27

Opera can reveal something fundamental about a film, and film can do the same for an opera, argues Marcia J. Citron. Structured by the categories of Style, Subjectivity, and Desire, this volume advances our understanding of the aesthetics of the opera/film encounter. Case studies of a diverse array of important repertoire including mainstream film, opera-film, and postmodernist pastiche are presented. Citron uses Werner Wolf’s theory of
intermediality to probe the roles of opera and film when they combine. The book also refines and expands film-music functions, and details the impact of an opera's musical style on the meaning of a film. Drawing on cinematic traditions of Hollywood, France, and Britain, the study explores Coppola's Godfather trilogy, Jewison's Moonstruck, Nichols's Closer, Chabrol's La Cérémonie, Schlesinger's Sunday, Bloody Sunday, Boyd's Aria, and Ponnelle's opera-films.

**British Marxism and Cultural Studies** - Philip Bounds 2016-04-20 A comprehensive exploration of the profound influence of Marxist ideas on the development of Cultural Studies in Britain, this volume covers a century of Marxist writing, balancing synoptic accounts of the various schools of Marxist thought with detailed analyses of the most important writers. Arguing that a recognisably Marxist tradition of cultural analysis began in the last two decades of the nineteenth century and continues unbroken to the present day, British Marxism and Cultural Studies traces the links between contemporary developments in the field and the extended tradition of which they form a part. With discussion of figures such as Jack Lindsay, C.L.R. James, Julian Stallabrass and Mike Wayne, as well as the cultural thinking of the New Left, Gramscian, Althusserian and Political Economy schools, this book shows that the history of British cultural Marxism is broader and richer than many people realise. As such, it will be of interest to scholars and students of sociology, cultural studies, intellectual history and the history of the Left.

**Film Theory: The Basics** - Kevin McDonald 2016-02-12 Film Theory: The Basics provides an accessible introduction to the key theorists, concepts, and debates that have shaped the study of moving images. It examines film theory from its emergence in the early twentieth century to its study in the present day, and
explores why film has drawn special attention as a medium, as a form of representation, and as a focal point in the rise of modern visual culture. The book emphasizes how film theory has developed as a historically contingent discourse, one that has evolved and changed in conjunction with different social, political, and intellectual factors. To explore this fully, the book is broken down into the following distinct sections: Theory Before Theory, 1915-1960 French Theory, 1949-1968 Screen Theory, 1969-1996 Post-Theory, 1996-2015 Complete with questions for discussion and a glossary of both key terms and key theorists, Film Theory: The Basics is an invaluable resource for those new to film studies and for anyone else interested in the history and significance of critical thinking in relation to the moving image.

Cognitive Film and Media Ethics - Wyatt Moss-Wellington 2021 Cognitive Film and Media Ethics provides a grounding in the use of cognitive science to address key questions in film, television and screen media ethics. This book extends past works in cognitive media studies to answer normative and ethically prescriptive questions: what could make media morally good or bad, and what, then, are the respective responsibilities of media producers and consumers? Moss-Wellington makes a primary claim that normative propositions are a kind of rigour, in that they force media theorists to draw more active ought conclusions from descriptive is arguments. Cognitive Film and Media Ethics presents the rigours of normative reasoning, cognitive science and consequentialist ethics as complementary, arguing that each seeks progressive elaboration on their own models of causality, and causal projections are crucial for any reflection on our moral responsibilities in the world. A hermeneutics of "ethical cognitivism" is applied in the latter half of the book, with essays each addressing a different case study in film, television, news and social media: cinema that
sets out to inspire moral dissonance in the viewer, satirical and humorous depictions of family drama in film and television, the politics of the romantic comedy, formal aspects of screen media bullying in an era dubbed the "television renaissance," and contemporary problems in the conflation of news and social media. Cognitive Film and Media Ethics synthesises current research in social psychology, anthropology, memory studies, emotion and cognition, personality and media selection, and evolutionary biology, integrating wide-ranging concepts from the various disciplines that make up cognitive theory to provide new vantages on the applied ethics of film and screen media.

**Accented Futures** Carli Coetzee 2013-06-01 In this wonderfully original, intensely personal yet deeply analytical work, Carli Coetzee argues that difference and disagreement can be forms of activism to bring about social change, inside and outside the teaching environment. Since it is not the student alone who needs to be transformed, she proposes a model of teaching that is insistent on the teacher’s scholarship as a tool for hearing the many voices and accents in the South African classroom. For Coetzee, ‘accentedness’ is a description for actively working towards the ending of apartheid by being aware of the legacies of the past, without attempting to empty out or gloss over the conflicts and violence that may exist under the surface. In the broad context of education, ‘accent’ can be an accent of speech; an attitude; a stance against being ‘understood’; yet a way of teaching that requires teacher and pupil to understand each other’s contexts. This is a book about the relationships created by the use of language to convey knowledge, particularly in translation. The ideas it presents are evocative, thought-provoking and challenging at times.
Accented Futures makes a significant and important contribution to research on identity in post-apartheid South Africa as well as to the fields of education and translation studies.

**Roy Andersson’s “Songs from the Second Floor”**
Ursula Lindqvist 2016-08-25
Swedish filmmaker Roy Andersson’s celebrated and enigmatic film Songs from the Second Floor, his first feature film in twenty-five years, won the Special Jury Prize at the Cannes Film Festival in 2000. The *songs* of the film’s title refer to Andersson’s artistic ruminations on the state of mankind from his office on the second floor of Studio 24 in Stockholm. The film presents a series of forty-six tableaux—long, deep-focus shots with a still camera, mostly in studio settings, using older visual tricks such as trompe l’oeil. The tableaux showcase seemingly trivial tragicomic situations designed to provoke thoughts about existential guilt, broken relationships, and the failure of social institutions to treat people as human beings. Lindqvist draws from interviews with Andersson and his team that provide a behind-the-scenes look at how the film was made and investigates its philosophical and artistic influences, providing a nuanced reading of a film that has both befuddled and entranced its
viewers. This first book-length study in English of Andersson's work considers his aesthetic agenda and the unique methods that have become hallmarks of his filmmaking, as well as his firm belief in film's revolutionary function as social critique.

Teaching ESL Composition- Dana R. Ferris 2004-09-15 In keeping with the spirit of the first edition, Teaching ESL Composition: Purpose, Process, and Practice, Second Edition presents pedagogical approaches to the teaching of ESL composition in the framework of current theoretical perspectives on second language writing processes, practices, and writers. The text as a whole moves from general themes to specific pedagogical concerns. A primary goal is to offer a synthesis of theory and practice in a rapidly evolving community of scholars and professionals. The focus is on providing apprentice teachers with practice activities that can be used to develop the complex skills involved in teaching second language writing. Although all topics are firmly grounded in reviews of relevant research, a distinguishing feature of this text is its array of hands-on, practical examples, materials, and tasks, which are presented in figures and in the main text. The synthesis of theory and research in a form that is accessible to preservice and in-service teachers enables readers to see the relevance of the field's knowledge base to their own present or future classroom settings and student writers. Each chapter includes: *Questions for Reflection--pre-reading questions that invite readers to consider their own prior experiences as students and writers and to anticipate how these insights might inform their own teaching practice; *Reflection and Review--follow-up questions that ask readers to examine and evaluate the theoretical information and practical suggestions provided in the main discussion; and
*Application Activities--a range of hands-on practical exercises, such as evaluating and synthesizing published research, developing lesson plans, designing classroom activities, executing classroom tasks, writing commentary on sample student papers, and assessing student writing. The dual emphasis on theory and practice makes this text appropriate as a primary or supplementary text in courses focusing on second language writing theory, as well as practicum courses that emphasize or include second language writing instruction or literacy instruction more generally. New in the Second Edition: *updated research summaries consider new work that has appeared since publication of the first edition; *revised chapter on research and practice in the use of computers in second language writing courses covers recent developments; *streamlined number and type of Application Activities focus on hands-on practice exercises and critical analysis of primary research; and *revisions throughout reflect the authors' own experiences with the text and reviewers' suggestions for improving the text.
